Hiring Manager

Capgemini

Dear Hiring Manager,

I am writing to express my keen interest in the Data Analyst position at Capgemini. With a strong academic background in Computer Science, hands-on experience in data analytics, and a passion for leveraging data to drive decision-making, I am excited about the opportunity to contribute to your data-driven initiatives.

Currently, I am interning as a Data Analyst, where I've built and optimized SSIS-based ETL pipelines, reducing data processing time by 25%. I have also developed Power BI dashboards that accelerated report generation by 30%, enabling faster business insights. Through SQL-based data modelling, profiling, and cleansing, I've ensured high-quality datasets that support critical business operations.

One of my key projects involved designing a complete Sales Analytics solution—from data integration to visualization—using Power BI and SQL Server. This hands-on experience gave me practical insight into end-to-end data workflows and how to translate raw data into actionable insights for stakeholders.

I am particularly drawn to Capgemini focus on innovation and data-driven strategies. My skills in SQL, Power BI, Excel, and ETL development, combined with a strong foundation in Python and a natural curiosity for solving business problems, make me well-suited to thrive in your environment.

Thank you for considering my application. I would welcome the opportunity to discuss how my background and goals align with your team's objectives. I am confident in my ability to add value as a Data Analyst and look forward to contributing to your continued success.

Sincerely,

Pranav Kantaram Gare
